Business Overview

eDocs Technologies is a registered COSTARS and ITQ small business providing enterprise content and professional information technology solutions across a wide range of businesses and government entities.

Our professionals have spent over a decade providing quality IT engineering and support services in the area of ECM, business management workflows, website integrations and financial and HR solutions. We are familiar with the demands our business and Government customers face and have adopted a proactive approach to developing real cost-effective solutions that meet the ever-changing needs of our clients, while maintaining the highest level of professional excellence.

eDocs constantly strives to manage our business effectively and efficiently so that we can pass cost savings on to our customers and deliver the best overall value. We are especially proud of our detailed discovery process and have a proven transition and training process that allows for immediate performance and accountability. We have the ability to onboard key personnel to ensure customer support and long term satisfaction.
